Aux Battery Retrofitting Guidelines Sprinter

The 55A version is probably the largest you should use in a Sprinter, and even that might be too much for the alternator in the long run. The benefit of using a proper DC-to-DC charger is that it can sense what state of charge the aux battery is in, and change its output accordingly, independent of the engine battery.

Hooking in to the Sprinter's charging system - Sprinter ...

Install two Aux battery trays. One was a Mopar Tray meant for Sprinters. The other was a General purpose battery tray. The Mopar Tray was mounted in the engine bay, up top, on the drivers side for the Starter Battery. General purpose battery tray was mounted on the passenger side lower engine Bay for #1 of 2 inverter batteries.
