Start Your Engine (At Least Try) Confirm that the fuel valve is on, there's gas in the tank and the spark plug is in good shape. Shoot a one-second burst of aerosol lubricant or carburetor cleaner down the throat of the carburetor. Yank the cord. Note: If the engine runs (even just sputters) and dies, you have a fuel problem. If there's no life after a few tries, it's something more serious and you need to haul the engine to your garage for some detective work.
