How To Fix Samsung TV Sound Problems [Simple Guide]

Samsung TV has no or low audio. As beautiful as the image on your screen is, sound still remains an important function, or you won't get the full experience of your favorite show or movie. Fortunately, as frustrating as sound dropout can be, your TV is rarely the reason for it. Your TV comes with a Sound Test to start with, and after that you can check ports and connections on your TV and the device it's connected to in order to hunt down and correct the issue.

Samsung TV has no or low audio

Push the Menu button on your TV Remote. Select Sound using the up and down keys, then push the center OK button. You can make adjustments to the Bass, Treble, Balance, and such here. Features such as "A.I. Sound" and "Auto Volume Leveling" are also here; they try to make soft and loud sounds the same volume, but can cause problems.

How to Fix Sound Issues for a Samsung Smart TV - Support.com

Press "Menu" on the remote, then select the "Support" menu. From there, select the "Self Diagnosis" option and then the "Sound Test". The TV should then play a melody out of the built-in speakers. If you hear the melody, then the sound problem (whatever it may be) isn't in the TV's components.
